Experience

Web Developer - Zodiac Group

2022 - current // Toronto, CA

- Wrote well designed, testable, efficient code by using best software development practices
- Created website layout/user interface by using standard HTML/CSS practices
- Integrated data from various back-end services and databases
- Gathered all project specifications and requirements with 95% fidelity to client needs
- Maintained, expanded, and scaled company's sites
- Cooperated with web designers to match visual design intent

Projects

CRUD Blog Web App

Node.js / Bootstrap / MongoDB / AWS

- Built an application that performs CRUD operations using Node.js
- Implemented both static and dynamic content
- Developed various features to optimize user experience, including easy access for users to edit/delete information
- Generated an authentication system for users to log in/out. All data is stored in MongoDB

Worldwide Poverty Rate

Vue.js / Netlify / HTML / CSS / JavaScript

Interactive Map

- Developed an interactive worldwide map using various front-end web tools
- Created using Vue.js as the front-end framework tool
- Fetched data using WHO's API through Vue.js' "mounted" hook
- Generated the map using AnyChart API, implementing it in Vue.js' "beforeCreate" hook
- Deployed the app using Netlify provider

React Ecommerce App

React / HTML / CSS / JavaScript

- Constructed an ecommerce application using React as the front-end framework tool
- Organized products list in Homepage, cart page and single product page
- Used useState and useEffect hooks to organize item count and to execute functions after React updates the DOM
- Assured the application is responsive to all device width sizes
